

OpusView at a glance

These days, organizations are faced with rapidly changing, more disruptive business environments. Problems are becoming more and more complex but need to be solved faster than ever before, making agility and flexibility truly must-have traits for any organization that wants to stay ahead of the competition.

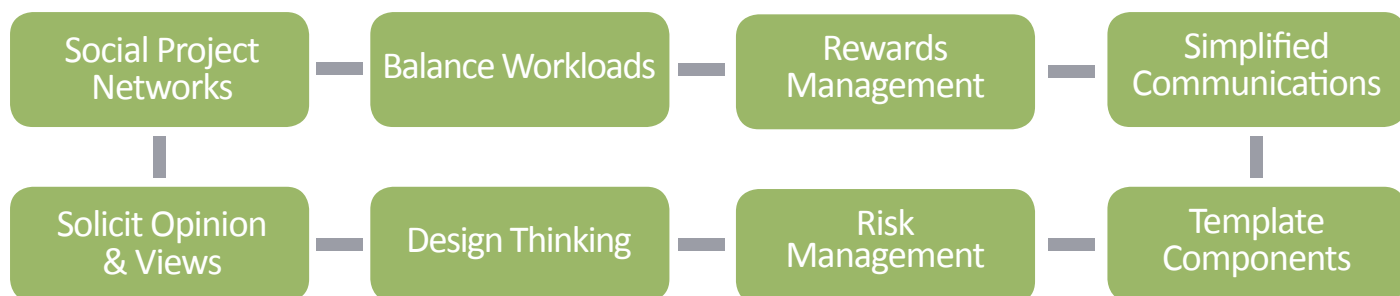

This is why effective project management is so important. Organizations need to be able to address, as well as balance, issues such as problem solving, risk evaluation and decision making—all while innovating and developing human resources at a rapid pace.

Project Social: Going Beyond Traditional Project Management

For too long, organizations have relied on a combination of tools for example; team messaging, to-do lists, risk management and Gantt charts to get work done. OpusView places all of these and more in one single solution and importantly, puts people at the center of success.

One of the biggest challenges large businesses face is the lack of clarity across the organization about what is being done, why and by whom. Simply put, teams lack a sense of purpose and direction—and this is why projects are failing.

Therefore, we can no longer depend on traditional project management approaches if we want to remain competitive. Instead, we need to be able to effortlessly enlist the help of subject experts from various fields and get them to work together quickly and efficiently to successfully execute initiatives, programs and projects.

OpusView: An Enterprise Solution for the Real World

OpusView is a project management solution engineered for the Real World to make the execution of programs and projects more efficient, successful and fun.

The ability to keep each individual involved in a project informed about who their coworkers are, what skills these people bring to the table, what risks to watch out for—in addition to deadlines, workloads and schedules—is crucial to the success of any business initiative.

This is exactly what OpusView is about.

It's packed with smart, powerful features—such as intelligent task allocation tools, personalized interactive Gantt charts and comprehensive yet easy-to-understand dashboard analytics—that help project managers easily pick the best, least work loaded people for each task and then allow every single person who gets chosen to see exactly what they're supposed to do, when they're supposed to do it, how well they're doing so far and why they have to do it.

OpusView also allows everyone connected to a project to effortlessly steer it in the right direction at any given time through built-in feedback channels, eliminating the risk for costly mistakes that could easily be avoided when all project members are given the power to easily call attention to potential issues early on.

Being in control not only helps reduce the stress levels of everyone involved in a project, but also creates a sense of camaraderie among teams, leading to better employee morale and, ultimately, increased productivity.

BUILD EFFICIENT TEAMS. GET BETTER OUTCOMES.

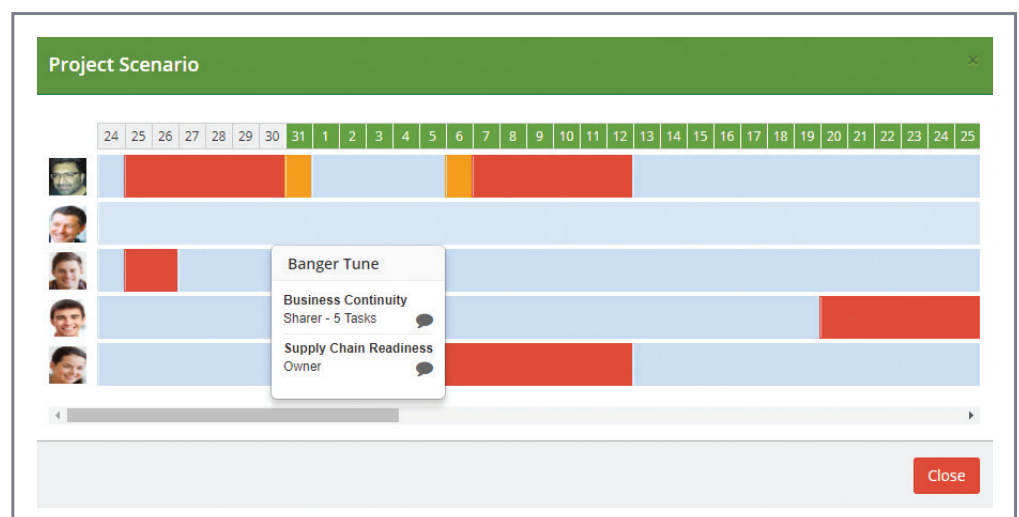

Connect People and Projects.

Forget Kanban boards, spreadsheets and standalone messaging tools. Keep your teams connected and give them a big picture view of the project all in one place using OpusView, the **Project Social Network** specifically engineered for organizations.

Take part in reviews, give feedback, vote for priority and flag issues through **Real-Time Interaction**. Use the **Task Center** to discuss the details of each task and their dependencies before they are allocated and executed.

Give team members an opportunity to speak out if they feel uncomfortable about their assigned deliverables.

Make sure workloads are fair and balanced throughout the duration of each project for excellent results.

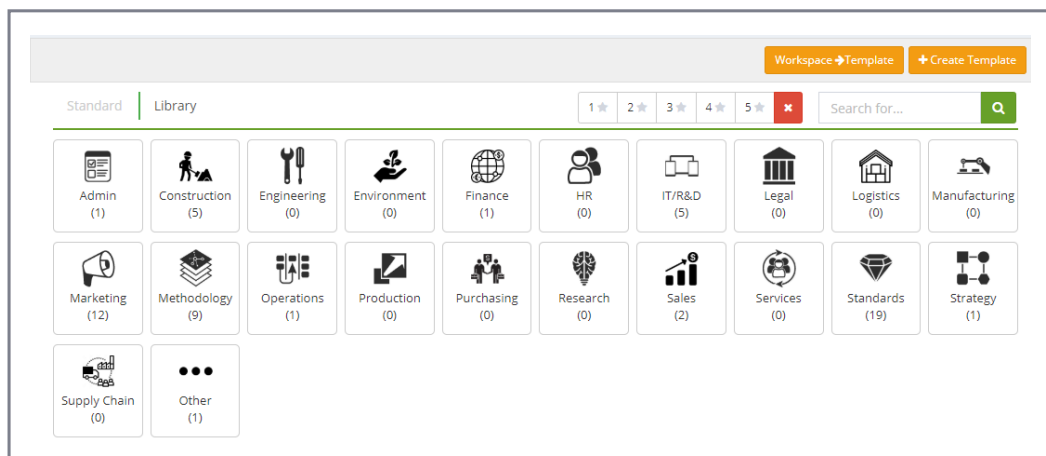

USE BEST PRACTICES. IMPROVE PERFORMANCE.

Turn Knowledge into reusable IP.

Why let your successes be a one-time affair when you can turn them into reusable models to improve the odds of future projects becoming equally successful and ultimately eliminate the need to always start from scratch?

OpusView's **Template Builder** enables organizations to combine “lessons learnt” from elements of each project, with all of your organization's top methodologies and standards.

Transform the data into a well-structured easy-to-understand format that can be accessed and shared by anyone in the company via a centrally managed library.

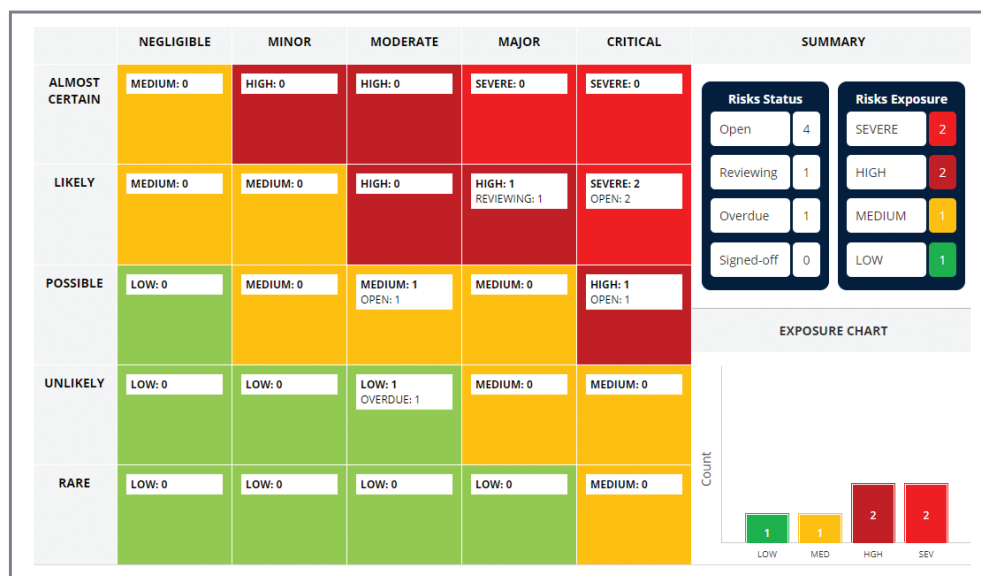

ENGAGE PEOPLE. EMPOWER TEAMS.

Get Real-time Insights & Intelligence.

OpusView's **Project Boards** provide people who want to get involved in a project with the opportunity to not only get in touch with other individuals in the organization, but also decide if their skills are suited to the needs of the initiative they're looking to work on.

The **Dashboards**, on the other hand, provide valuable insights into and a clear big picture view of each project to managers, team leads and team members, making decision making and course correction a breeze.

The **Risk Center** displays an easy-to-read heat-map that accurately depicts project risks.

OpusView provides extensive risk management including contingency, mitigation and residual risk planning. This not only helps drive compliance and governance for the organization as a whole, but also equips everyone involved in each project with the data they need to eliminate problems before they even come up and ultimately minimize the risk for failure.

PLAN WITH CONFIDENCE. DELIVER WITH CERTAINTY.

Define your outcomes and successes.

OpusView's **Studio**, allows program and project managers to design the project plan, defining intended outcomes upfront, including the Social Network, Cost Management and full Risk Planning—and then revise everything as much as necessary as the project progresses and unexpected challenges and opportunities come up along the way.

The screenshot displays the OpusView Studio interface with four main panels:

- Project:** Shows a 'Specific Objective' for 'Business Continuity' with a start date of 19 Feb, 2018 and end date of 07 Mar, 2019. The project objective is 'Implement Business Continuity Strategy'.
- Workspaces:** Displays 'Key Result Targets' for 'Business Continuity 1' (Start: 19 Feb, 2018, End: 20 Feb, 2019) and 'Business Continuity 2' (Start: 29 Mar, 2018, End: 27 Feb, 2019).
- Areas:** Shows 'Active Zones' including 'Recovery Strategies' and 'Impact Analysis'.
- Elements:** Lists tasks and resources such as 'Questionnaire' (Start: 20 Feb, 2018, End: 06 Mar, 2018), 'Gap Analysis' (Start: 24 Jul, 2018, End: 05 Nov, 2018), and 'Options' (Start: 24 Sep, 2018, End: 03 Dec, 2018).

Create project structures, visualize workflows, create and coordinate with relevant teams, find the necessary skills, manage roles and define clear targets. Align all necessary resources to the goals of the project and make sure everyone knows what they need to do and why.

RECOGNIZE WORK EFFORT. REWARD ACHIEVEMENT.

Incentivize and reward project success.

OpusView **Reward Center** incentivizes and rewards project stakeholders, to make sure peoples work effort and success is being recognized and rewarded in a positive way, whether it's weekly, monthly or milestone based. Reward Center is the only project tool which directly connects work execution activities, at group or individual levels, to rewards.

The screenshot displays the OpusView Reward Center interface for the project 'Vehicle X277 Optimizations' (Start: 19 Feb 2018, End: 06 Mar 2019 - Owner).

Summary Metrics:

- Projects: 6, Owner: 6, Sharer: 0
- OV Rewards Opt In: ☒
- OV Reward Tables Opt In: ☒
- 120 Total Achieved
- 20 Total Redeemed
- 100 Total Available

Project Allocation: 1000 Project Allocation, 500 Project Distributed

Project Status:

- Project Achieved By Accelerators: 0 (23)
- Project Redeemed (0)
- Project Available (23)
- Accelerator 23 April 2019 (20%)

Reward Table:

All	Title	OV Reward	Given By	Date	Reason
Workspace	PowerTrain System.	12	[Avatar]	14 Oct 2018	Excellent team leadership, work delivered ahead of end date.
Sub To-do	Carry-overs.	2	[Avatar]	03 Oct 2018	Great analysis and presentation.
Task	Supplier Contracts.	3	[Avatar]	30 Sep 2018	Identified new supplier opportunities very quickly.
